

Mikaela Mäensivu

Design Engineer

San Francisco · mikaela@wingedapp.com · linkedin.com/in/mikaelamaensivu · mikaela.world

PROFILE

I think like a designer and build like an engineer. Eight years designing consumer products and four years shipping the code behind them. At Winged I designed every surface of an AI product, the flows, the system, the pixels, then wrote the production code across three repos in React, TypeScript, and Swift. I prototype fast: when we needed a new interaction paradigm I rebuilt the product in two weeks, live with 1,600 users. I work best on small teams that ship.

CORE SKILLS

Frontend	React, TypeScript, Next.js, CSS, Framer Motion, responsive web, component libraries, design systems, tokens, motion and interaction design, Figma to production
Product Design	End-to-end UI/UX, wireframe through shipped interface, design systems and component libraries, interaction and motion design, prototyping in Figma and in code, new interaction paradigms
AI & Voice	ElevenLabs voice models, voice cloning, conversational flows, realtime voice agents, multi-agent orchestration, MCP servers, Claude and Anthropic API, OpenAI, prompt design
Full-Stack	Node.js, Postgres, Supabase, Swift and SwiftUI (App Store shipped), Twilio SMS and voice, cloud infrastructure, AI-native development
Workflow	Full-stack feature ownership, 0 to 1 definition and roadmap, rapid prototyping (hours, not days), leading small engineering teams, high-velocity shipping

EXPERIENCE

Co-Founder & CEO · Winged Sep 2025 – Present · San Francisco / Helsinki

Antler-backed AI matchmaking agent. The product is the agent, not the app.

- Designed and built every surface end to end, onboarding, conversational and voice flows, iOS app, marketing site, and the design system underneath it, then wrote the production code across three repos in React, TypeScript, and Swift.
- Prototyped and shipped a new interaction paradigm in two weeks, scrapped the app model entirely and rebuilt Winged as an SMS and voice agent. Live product, 1,600 users in SF and Helsinki.
- Integrated ElevenLabs voice throughout the agent call experience, designed the voice character, cloned and tuned the voice model, and built the call flow that replaces traditional onboarding with a single conversation.
- Built reusable component libraries and design systems across web and iOS, maintaining visual consistency across every touchpoint.

AI, Product & Design Consultant · Architechtura Jul 2022 – Sep 2025 · Miami / Remote

- Took four AI products from prototype to launch, a realtime voice companion, a spoken-language tutor, a multi-model LLM workspace (Mistral, ChatGPT, Claude), and an AI mental-health coach. Designed the interface and wrote the frontend for each.
- Rapid prototyping across new AI interaction paradigms, each product required inventing UI patterns that did not exist yet: voice-first onboarding, real-time transcription UI, multi-model context switching.
- Rebuilt major Shopify storefronts with measurable conversion and revenue gains.

COO, Product & Design · Blocktickets Sep 2022 – Nov 2024 · New York

Mobile-first live-event ticketing built to beat Ticketmaster on price transparency.

- Owned the entire product experience, seat-map builder, season and group ticketing, flex packs, resale, and a two-click checkout, from roadmap and specs through to shipped UI.
- Led a two-person engineering team and built internal tooling across lead-gen, fundraising, and support.
- Raised \$600K+ and wrote the pitch decks and investor materials that closed it.

Co-Founder & COO · Supernovas Labs Sep 2021 – Sep 2022 · Helsinki

- Co-founded a decentralized social network funded through DeSo's \$50M Octane Fund (a16z, Sequoia, Coinbase Ventures). Owned product, growth, and operations. Grew to 10K daily active users.

Talent Acquisition & Stakeholder Management · Goldman Sachs Sep 2017 – Jun 2020 · New York

Built the teams behind Marcus and Apple Card. Senior stakeholder relationships across Consumer Banking, Securities, and Compliance.

EDUCATION & EARLIER

Rollins College — B.A., English Language & Literature (Economics, Studio Art, Political Science) Winter Park, FL

Yale University — The Science of Well-Being, Executive Education 2020
