

Mikaela Mäensivu

Frontend Engineer

San Francisco · mikaela@wingedapp.com · linkedin.com/in/mikaelamaensivu · mikaela.world

PROFILE

I build interfaces that feel right. Eight years designing consumer products and four years shipping the code behind them. At Winged I built the entire frontend across web and iOS, React and TypeScript on one side, Swift and SwiftUI on the other, with a shared design system keeping everything consistent. I care about the details: animations, type, spacing, interaction states. I ship fast and I ship clean.

CORE SKILLS

Frontend	React, TypeScript, Next.js, CSS, Framer Motion, responsive web, cross-platform, component libraries, design tokens, animation and interaction, performance optimization
Mobile	Swift, SwiftUI, shipped to App Store, cross-platform design systems, native animations and transitions
Design	End-to-end UI/UX, pixel-perfect implementation, design systems, interaction and motion design, Figma to production, typography and spacing
AI Integration	ElevenLabs voice (WebRTC, browser sessions), realtime streaming UI, AI-native interfaces, Claude and OpenAI APIs, conversational flows
Backend	Node.js, Postgres, Supabase, Twilio SMS and voice, REST APIs, cloud infrastructure

EXPERIENCE

Co-Founder & CEO · Winged Sep 2025 – Present · San Francisco / Helsinki

Antler-backed AI matchmaking agent. The product is the agent, not the app.

- Built the entire frontend across three platforms, React and TypeScript on web, Swift and SwiftUI on iOS, with a shared design language and component system across both.
- Rebuilt the product in two weeks when the market shifted, scrapped the app, relaunched as an SMS and voice agent with a web experience. 1,600 users in SF and Helsinki.
- Shipped real-time voice UI with ElevenLabs, WebRTC browser sessions for voice onboarding, real-time transcription, and post-call audio playback. Built the interaction patterns from scratch.
- Built a hand-drawn, interactive portfolio (mikaela.world) in vanilla HTML, CSS, and JS. Handwritten note animation, image-mapped hotspots, sticker reactions, all without a framework.

AI, Product & Design Consultant · Architektura Jul 2022 – Sep 2025 · Miami / Remote

- Built the frontend for four AI products, a realtime voice companion, a spoken-language tutor, a multi-model LLM workspace (Mistral, ChatGPT, Claude), and an AI mental-health coach. Each required inventing new UI patterns: voice-first onboarding, real-time transcription, multi-model context switching.
- Rebuilt major Shopify storefronts with measurable conversion and revenue gains.

COO, Product & Design · Blocktickets Sep 2022 – Nov 2024 · New York

Mobile-first live-event ticketing built to beat Ticketmaster on price transparency.

- Owned the entire product experience, seat-map builder, season and group ticketing, flex packs, resale, and a two-click checkout, from roadmap and specs through to shipped UI.
- Led a two-person engineering team and built internal tooling across lead-gen, fundraising, and support.
- Raised \$600K+ and wrote the pitch decks and investor materials that closed it.

Co-Founder & COO · Supernovas Labs Sep 2021 – Sep 2022 · Helsinki

- Co-founded a decentralized social network funded through DeSo's \$50M Octane Fund (a16z, Sequoia, Coinbase Ventures). Owned product, growth, and operations. Grew to 10K daily active users.

Talent Acquisition & Stakeholder Management · Goldman Sachs Sep 2017 – Jun 2020 · New York

Built the teams behind Marcus and Apple Card. Senior stakeholder relationships across Consumer Banking, Securities, and Compliance.

EDUCATION & EARLIER

Rollins College — B.A., English Language & Literature (Economics, Studio Art, Political Science) Winter Park, FL
