

Mikaela Mäensivu

Product Engineer

San Francisco · mikaela@wingedapp.com · linkedin.com/in/mikaelamaensivu · mikaela.world

PROFILE

I own features from idea to production. Eight years building consumer products and four years shipping the code behind them. At Winged I defined the product, designed every flow, and wrote the production code across three repos. When the market shifted from apps to agents, I scrapped the product and relaunched in two weeks, live with 1,600 users. I think in systems, ship fast, and care about what the user actually experiences.

CORE SKILLS

Product	0 to 1 product definition, roadmap and specs, user research, growth strategy, feature prioritization, launch planning, metrics and iteration
Engineering	React, TypeScript, Next.js, Node.js, Postgres, Supabase, Swift and SwiftUI (App Store shipped), Twilio SMS and voice, cloud infrastructure
Design	End-to-end UI/UX, wireframe through shipped interface, design systems, interaction and motion design, prototyping in Figma and in code
AI & Agents	AI-native development, multi-agent orchestration, MCP servers, ElevenLabs voice, Claude and OpenAI APIs, realtime voice agents, prompt design
Leadership	Full-stack feature ownership, leading small engineering teams, fundraising (\$600K+ raised), stakeholder management, high-velocity lean teams

EXPERIENCE

Co-Founder & CEO · Winged Sep 2025 – Present · San Francisco / Helsinki

Antler-backed AI matchmaking agent. The product is the agent, not the app.

- Defined and shipped the entire product end to end, from concept through design, engineering, and launch across iOS, web, SMS, and voice. Three repos, no dedicated engineering team.
- Pivoted the product in two weeks when the market shifted, scrapped the app model, relaunched as an SMS and voice agent. 1,600 users in SF and Helsinki.
- Built the full agent pipeline, onboarding calls, AI matchmaking, date scheduling, post-date follow-up. Owned every decision from product strategy to database schema.
- Shipped cohesive experiences across every surface, one agent with consistent voice and character across SMS, phone calls, web, and iOS.

AI, Product & Design Consultant · Architechtura Jul 2022 – Sep 2025 · Miami / Remote

- Took four AI products from idea to launch, a realtime voice companion on ElevenLabs, a spoken-language tutor, a multi-model LLM workspace, and an AI mental-health coach. Owned product definition, design, and frontend on each.
- Rebuilt major Shopify storefronts around conversion with measurable revenue gains.

COO, Product & Design · Blocktickets Sep 2022 – Nov 2024 · New York

Mobile-first live-event ticketing built to beat Ticketmaster on price transparency.

- Owned the entire product, seat-map builder, season and group ticketing, flex packs, resale, and a two-click checkout. Defined the roadmap, wrote specs, and shipped the UI.
- Led a two-person engineering team and built internal tooling across lead-gen, fundraising, and support.
- Raised \$600K+ and wrote the pitch decks and investor materials that closed it.

Co-Founder & COO · Supernovas Labs Sep 2021 – Sep 2022 · Helsinki

- Co-founded a decentralized social network funded through DeSo's \$50M Octane Fund (a16z, Sequoia, Coinbase Ventures). Owned product, growth, and operations. Grew to 10K daily active users.

Talent Acquisition & Stakeholder Management · Goldman Sachs Sep 2017 – Jun 2020 · New York

Built the teams behind Marcus and Apple Card. Senior stakeholder relationships across Consumer Banking, Securities, and Compliance.

EDUCATION & EARLIER
